

Social Impact Award for Emerging Nonprofits

After 800 projects and 10 years experience developing CRMs for nonprofits, Idealist Consulting has become a premier consulting partner for nonprofits looking to improve their constituent relationship management.

Much of Idealist Consulting's success can be attributed to the growth of our clients. [Education Pioneers](#), [Access Fund](#), and even the [Nike Foundation](#) were once small nonprofits searching for effective ways to advance their missions. Because of their tactical methods of investing in forward-thinking technologies, these and many more nonprofits have seen great success over the years. We have enjoyed being part of that journey; thank you for trusting us to support you.

In recognition of this trust, Idealist Consulting is offering the **Social Impact Award for Emerging Nonprofits**. This is our way of supporting the nonprofit community and acknowledging the fundamental importance of the emerging nonprofit, which helped us become the consulting group we are today.

Qualified organizations must:

- Be under 1 million dollars in revenue for the most recent year
- Be committed to Salesforce.org as their primary database
- Be prepared to make a minimum \$5,000 financial contribution to the project
- Have a mission approved by the Idealist Consulting grant committee
- Have a head office based in the United States

The Social Impact Award for Emerging Nonprofits is extended in consultant labor and may not be traded for direct monetary value. In the event your project is awarded, the gift will be applied by discount toward our standard rate. Awards are determined by the Idealist Consulting grant committee which will review each applicant's qualifications and mission affinity. Some project deployment stipulations may apply.

About Idealist Consulting

Idealist Consulting is not just focused on doing well, but doing good. We provide nonprofits and businesses with advanced technical solutions that help them run more efficiently. Whether it's Salesforce consulting, mobile development, or technical training, we provide thoughtful and ethical support.
